How to flash the controller's microSD card

When instructed by the 3DR technical support staff, this is the procedure to flash the microSD card of the controller to factory conditions. Pairing Solo and Controller, and preflight Software update will be needed after performing this procedure.

1. Disconnect the battery and remove the antennas.
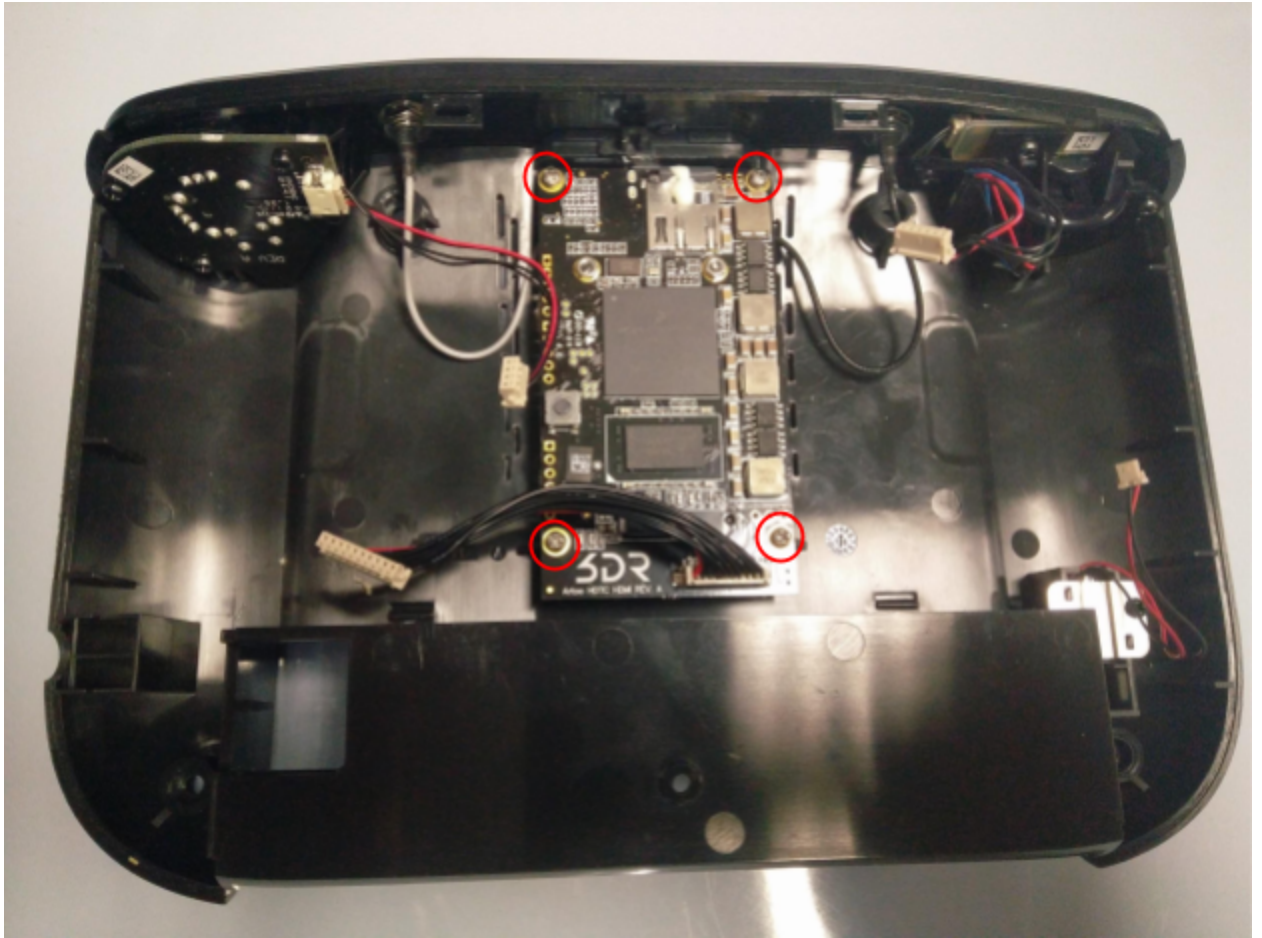

2. Remove the 5 screws

3. Separate the back cover and disconnect the 2 cables

4. Disconnect the next 2 cables and remove the glue

5. Remove the 4 screws

6. Remove the glue to eject the microSD card

7. Use a card reader or an SD card adapter to read the card on your computer, take note of the unit assigned to the device (i.e. F:)
8. Download the SD image from here **[link pending]**
9. Download disk image software from here and install it.
10. Open the software, select the image file and the microSD device unit

11. Click on "Write" button
12. Re-insert the microSD card into the controller and reassemble the controller following the steps of this document in reverse order.
